

SURYA S

Bengaluru, Karnataka | +91 8088719648 | suryassuryas001@gmail.com | <https://linkedin.com/in/surya-s-15a6a0344>

CAREER OBJECTIVE

Electrical and Electronics Engineering student with hands-on experience in power transmission systems, thermal power plant operations and electric vehicle technologies. Seeking opportunities to apply my technical knowledge, problem-solving skills, and practical training in core engineering or technology-driven roles.

EDUCATION

B.Tech in Electrical and Electronics Engineering

Aug 2023 – June 2027

CGPA: 8.54/10 [REVA University, Bengaluru]

PUC (PCMB)

March 2023

Percentage: 92.16 [Jnana Bharathi PU College, Kunigal]

SSLC

July 2021

Percentage: 88 [Stella Maris High School, Kunigal]

SKILLS

Programming Languages: C, C++, Python

Engineering Software and Tools: Circuit design, AutoCAD, Arduino IDE, Microsoft Excel, MATLAB

Core Engineering Domains: Power Electronics, Electrical Machines, Electric Vehicles, Embedded Systems

Professional Skills: Problem Solving, Teamwork, Communication, Analytical Thinking

INTERNSHIP & TRAINING EXPERIENCE

Karnataka Power Transmission Corporation Limited (KPTCL)

Jul 2025 – Aug 2025

- Gained practical exposure to 220 kV transmission lines, substations, and power system equipment including transformers, circuit breakers, and protective relays. Studied transmission system operations, fault protection schemes, and maintenance.
- Developed a strong understanding of high-voltage electrical systems, substation safety procedures, and real-world utility operations through on-site learning.

Adani Dahanu Thermal Power Station – Industrial Training

Apr 2026– May 2026

- Learned about the working of boilers, turbines, generators, and other major systems involved in thermal power generation.
- Gained practical knowledge of switchyard operations, plant maintenance activities, and industrial safety practices in a thermal power plant environment.

PROJECTS

Electric Vehicle Design & Development – Capabl EV Saksham

Mar 2024 – Apr 2024

- Worked on understanding the design and working of an electric vehicle, including battery, motor, and control systems. Learned about EV powertrain, Battery Management System (BMS), and energy management through hands-on training and practical sessions.
- Gained practical knowledge of electric vehicle technologies and their applications in sustainable transportation.

AI and IoT-Based Smart Irrigation System for Precision Farming

Dec 2025

- Developed an IoT-based irrigation system to monitor soil conditions and automate water supply, improving water management efficiency.
- Integrated sensors and a microcontroller to enable real-time monitoring and smart irrigation control for agricultural applications.

CERTIFICATIONS

- Introduction to Internet of Things (NPTEL) Jan 2025 – Apr 2025
- MathWorks Power Systems Simulation Onramp Jun 2026
- MathWorks Control System Modeling Essential Apr 2026
- Python Programming (Infosys springboard) June 2025

ACHIEVEMENTS & LEADERSHIP

- Represented **Karnataka** in Senior National Kabaddi Championship. Jun 2025
- Sports Head**, Department of Electrical & Electronics Engineering, REVA University.
